

MSE releases industry first HP Color LaserJet 4600 compatible transfer belt

Van Nuys, California – Micro Solutions Enterprises (MSE), the industry leader for quality compatible cartridges, is first to offer a HP Color LaserJet 4600 compatible transfer belt.

At World Expo 2008, MSE announced the release of the HP Color LaserJet 4600 Series compatible transfer belt. This product is a result of two years of research and development and performs to exacting OEM specifications. The belt has been tested in all models including the HP 4600, 4610 and 4650 Series machines and is guaranteed to be compatible with all units.

“Our Research and Development Teams have worked very hard to not only release this product but to also have it perform like the originals.” said Yoel Wazana, President. “We invested into the tooling to produce a seamless belt and our testing has shown yields that exceed the OEM by as much as 50%. Our new belt clearly outperforms any reused belt and eliminates background hazing associated with worn belt units. The HP 4600 has a large population and we expect this to be a popular product – especially because of its color matching properties.”

Micro Solutions Enterprises (MSE) is an STMC Compliant Company utilizing ISO 19752 quality testing along with patented technologies to manufacture a full line of high-quality compatible toner cartridges, MICR toner cartridges, inkjets and thermal transfer ribbons. MSE’s Quality has been voted to be the industry’s best for 4 consecutive years and MSE’s manufacturing capacity exceeds 300,000 toners and 500,000 inkjet cartridges per month. The company owns and operates 285,000 square feet in California and Pennsylvania as well as additional distribution facilities in Canada, the Netherlands, Brazil and Israel. MSE offers full solutions for outsourcing, private labeling, private packaging, and blind drop shipping. The company also offers award-winning sales training, marketing materials and additional value-added services.
