

MSE achieves ISO 9001 certification

VAN NUYS, CA – Micro Solutions Enterprises (MSE), an industry leader for quality compatibles, achieves ISO 9001 certification.

“For 15 years, MSE quality and processes have been documented by our engineers,” said President Yoel Wazana. “Prior to certification, MSE maintained detailed processes for product quality and continuous improvement. Although obtaining this prestigious certification was not easy, we had the foundation for it already in place. Our certification demonstrates MSE’s dedication to a systematic and quantifiable approach to quality through our continuous improvement programs. We are very proud to be recognized by ISO for our relentless pursuit of quality,” added Wazana. “Our employees make the difference and we would like to thank them for their efforts to obtain this prestigious certification.”

The ISO 9000 family of standards for quality management systems is maintained by ISO, the International Organization for Standardization and is administered by accreditation and certification bodies. Some requirements of ISO 9001 include procedures covering key processes in the business; monitoring these processes to ensure they are effective; keeping adequate records; checking output for defects, with appropriate and corrective action where necessary; regularly reviewing individual processes and the quality system itself for effectiveness; and facilitating continual improvement.
